ADD SPIROMETRY TO YOUR CARDIOVIT AT-102 G2

With the SpiroScout SP plus, the CARDIOVIT AT-102 G2 also becomes a spirometer. Thanks to GANSHORN's ultrasound technology, spirometry recordings are highly accurate and the sensor is maintenance- and calibrationfree. The disposable ScoutTubes ensure maximum hygiene and patient safety. ScoutTubes are CO₂ neutral.

The spirometry option offers FVC, SVC and MVV with a large selection of reference standards, pre and post tests, as well as interpretation of the FVC results.

The device provides feedback on the procedure's quality during the test and after each trial.

Complete spirometry results can be printed on thermal paper as well as exported to EMR/HIS systems.

An incentive screen is included for trials with children.
