TRUSCOPE[®] III

TRUSCOPE III monitor is a high-performance patient monitoring system designed to deliver accurate and real-time vital sign measurements, ensuring reliable care in critical environments.

Advanced Patient Monitoring Features

- ✦ TRUSCOPE III features a 12.1" high-resolution color TFT LCD display, ensuring clear and detailed visualizations.
- ✦ With 168 hours of tabular and graphic trend data storage, healthcare professionals can easily track patient progress over time.
- ✦ The standard configuration includes ECG, Respiration (RESP), Non-invasive Blood Pressure (NIBP), SpO₂ and Temperature monitoring.
- ✦ It is equipped with a pacemaker detection facility and offers two USB ports for enhanced connectivity and data transfer.

User Friendly Design

- ✦ The TRUSCOPE III monitor features an intuitive interface with customizable smart keys, simplifying complex tasks and streamlining workflows.
- ✦ This design boosts efficiency, minimizes errors, and helps healthcare professionals concentrate on patient care during high-pressure situations.

Comprehensive Network Monitoring

- ✦ TRUSCOPE III ensures seamless connectivity, offering both wired and Wi-Fi options to maintain a continuous and reliable link to the central nursing station.
- ✦ Enables healthcare professionals to monitor vital sign parameters in real-time, ensuring prompt and accurate patient care.
- ✦ The system's full compatibility with HIS / HL-7 standards, enhancing integration and ensuring efficient communication across all healthcare platforms.

Effortless Data Management and Transfer

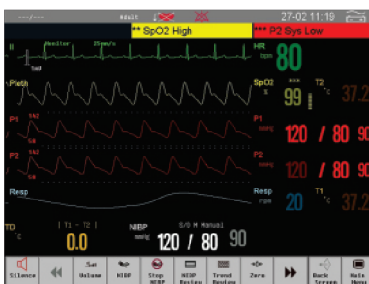

- Our monitoring system is designed with user convenience in mind, offering straightforward data management solutions.
- The USB export feature simplifies the transfer of trend data for accessible critical patient information
- The plug-and-play interface supports a variety of peripheral devices, such as USB sticks and mice, making data retrieval and device operation both intuitive and efficient.
- The system supports data export directly to a PC, which can be viewed and analyzed using our dedicated PC Viewer Software, providing healthcare professionals with the tools they need to make informed decisions.

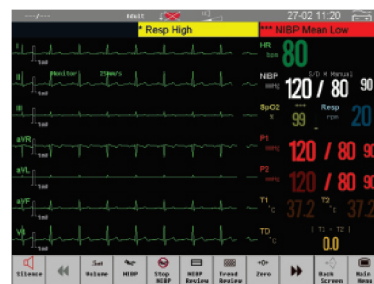

Customizable Screen Layouts for Optimal Viewing

- Understanding the diverse needs of healthcare environments, our system comes equipped with eight different screen layouts.
- Customizable views are designed to accommodate various angles and distances, ensuring that critical information is always visible and accessible, no matter where the healthcare provider is positioned.
- Enhances workflow efficiency and allows for more flexible monitoring solutions tailored to the specific needs of each user.

About SCHILLER

SCHILLER A. G., a company based in Switzerland, was founded by Alfred Schiller in 1974. Over the last 50 years, it has evolved into a successful Global Group with 31 subsidiaries and dealers across 30 countries. Today, SCHILLER is a world-leading manufacturer and supplier of devices for cardiopulmonary diagnostics, defibrillation and patient monitoring as well as software solutions for the medical industry.

Schiller in India was founded as a joint venture in 1997, and since then has established itself as a leader in the medical technology sector. With 450+ employees, a state-of-the-art ISO 13485-certified production centre in Puducherry, multiple R&D centres, and 17 offices across India; Schiller makes advanced healthcare equipment accessible through a network of 100 sales and service dealers across more than 45 locations. Our product range includes Critical Care, Anaesthesia, Emergency Care, Cardiology, Respiratory Diagnostics, Radiology, and Robotics.
